

FUNDRAISER

LOOKING TO RAISE MONEY FOR YOUR SCHOOL AND TEACH YOUR STUDENTS NEW SKILLS?

In the **Food Growing League**, students practice their MATH and SCIENCE skills with the hands on activity of competitive food growing in the classroom. The **Spring Season** allows students to sell the plants they've been growing for three months in a Mother's Day Plant Sale School Fundraiser.

Designed for 3rd-12th grades, up to four classes can take part using one kit that can produce as many as 90 plants to sell or take home. The **Fall Season** of the program has students planting and harvesting microgreens every month. These greens can be given away or sold as pet food using **GrowBucks**. Both the Fall and Spring Seasons can be used to boost outdoor school gardens.

MORE PROGRAMS

GROWBUCK (GB) is an attendance, economics, and job training program all rolled into one. Based on our 2014 Economy, Jr. program, the mission is to create a micro economy on campus that mirrors the real world as close as possible allowing students to practice buying and selling, future part time jobs/careers, paying common expenses, and more.

LOCAL CONGRESS (LC) lets the next generation of workers currently in middle and high school exchange their views with business owners allowing both groups to learn from the other in a respectful manner. This is done by having students and business owners serve as "extra" US Congress members surveying their peers and casting votes on current business legislation.

ABOUT REBUILDUP, LLC

Because Education Creates Jobs, ReBuildUp, LLC specializes in developing Health & Job related Curriculum for Elementary through High School. Now in our 5th year, our Math & Science themed programs teach the soft skills that first time employers and internship providers are seeking.
